Z. Naturforsch. **2012**, *67b*, 171 – 175; received November 3, 2011

Four new acylated grayanane diterpenoids, pierisformosins E–H (**1**–**4**), together with two known ones, pierisformosins B and C (**5**, **6**), were isolated from the fruits of *Pieris formosa*. The structures and relative configurations of the new compounds were elucidated by means of spectroscopic methods, including 1D and 2D NMR and mass spectrometry.

Key words: Grayanane Diterpenoids, *Pieris formosa*, Ericaceae
